skimmer

PS-60

INSTALLATION GUIDE

Thank you for purchasing our [Hang on protein skimmer](#) that provides optimum performance with maximum safety and reliability.

| Model | PS-50 | PS-60 | PS-80 |
|-------------------------------|---------------|---------------|---------------|
| Size (mm) | 100*65*280 | 120*85*330 | 180*90*420 |
| Reaction Chamber | 40mm | 60mm | 80mm |
| Outlet | 16mm | 20mm | 25mm |
| Max.Flow Rate | 500L/H | 730L/H | 1100L/H |
| Max.Air Intake | 100L/H | 150L/H | 250L/H |
| Max.Tank Size | 90L | 120L | 200L |
| Place for Installation | Interior/sump | Interior/sump | Interior/sump |
| Pump | 6W | 9W | 15W |

Importance

Prior to the installation, please read the manual and the following proper operation instruction carefully:

- Assemble parts and components according to the illustration.
- Do not move the skimmer when it is working, otherwise it will cause permanent damage.
- It would not be better let the skimmer work in the water temperature above 35 degrees or below freezing point, otherwise it will cause some damage.
- When the skimmer is working, make sure voltage and frequency in accordance with the specified instruction.

Part Names

- A. Lid for collection cup
- B. Collection cup
- C. Rotation Type Water Level Adjustor
- D. Diversion Box
- E. Water Pump
- F. Air Intake Tube
- G. Air Filling Part

Maintenance

- Collection cup needs to clean regularly to remove precipitation and impurities.
- Reaction Chamber do not need to clean, unless there is some impurity stick to the wall.
- If the device can not work normally, please check the following details:
 - A. Check whether socket and plug is well connected or there is power supply.
 - B. Check if there is any impurity blocking noise silencer, air intake tube or air filling part when there is less or no bubbles while working.
 - C. Since rotor or impeller maybe blocked and damage by sands or impurities, the water pump installation should be carried out in no sands and impurities.
